Product Specification Sheet

Sapphire Online

Product Specification Sheet

Security, Savings, Real-time stock control and Reporting

Features & Benefits:

The Sapphire range of terminals is used in bus and transport depots and utilises both card and touchless key technology.

There is a Sapphire terminal to suit all requirements and budgets. No matter what size your business we have a solution to suit your needs.

The Sapphire terminal can be linked to your tank gauge to show complete stock and Transaction activity on the same screen.

The Sapphire terminal can also work in conjunction with the MCS VIB Datalink in cab device range to guarantee kilometre/ mileage information for fuel management reporting.

The 5 reasons you need Sapphrie...

- You can use your existing fuel cards to make it easy for your drivers
- It's instant! Every home depot transaction is on your own private web portal within seconds
- Stainless steel construction with alphanumeric, (Qwerty) keyboard makes entering asset numbers easy
- Allows you to track every litre of fuel no matter where you fuel up from
- Automated reporting on any tank, any site, any vehicle or any user, saving office downtime
